

# **RELATIVE CLAUSES EXERCISE!**

**By Sarthak**

- The class will be divided into 2 groups- A and B
- Each group has to make 10 questions with their answers
- The questions will consist of relative clauses- what, which, when, how, where etc.
- Both the groups will ask each other their questions, one by one
- If the other group guesses the answer, they get 1 point. If the other group is not able to guess or their answer is incorrect, 1 point goes to the group which asked the question
- The team with most points wins the game
